## Touch International Offers Integrated Touch Monitors Below Factory Cost to Promote New Capacitive Touch Screen

### 15" Capacitive Touch Screen Monitors From \$299 Until May 1, 2003

AUSTIN, TX -- (INTERNET WIRE) -- 03/05/2003 -- Touch International, a global supplier of touch-input products, today introduced CGT, the newest addition to its capacitive touch screen product family. CGT is designed for pin-to-pin compatibility to ClearTek®, 3M Touch Systems' capacitive product family, and is intended to give touch screen system integrators a higher quality product for capacitive technology. Lab tests show that Touch International's CGT outperforms its competitor in optical clarity -- a key feature for kiosk, gaming and industrial markets.

For a limited time, customers can evaluate the new touch screen by purchasing a 15" capacitive CRT touch monitor for just \$299, a 15" open-frame touch LCD monitor for \$499, or a 15" desktop LCD touch monitor for \$599.

"As a touch screen component manufacturer and supplier, we want to make it easy for customers to test our new product," stated Gary Barrett, Co-founder and Chief Technology Officer, Touch

International. "So, we're temporarily offering integrated touch monitors at 50% off retail, making it inexpensive and hassle free to evaluate Touch International as a new source for high-quality capacitive touch screens."

"The introduction of our CGT product rounds out our capacitive family offerings," said Michael Woolstrum, CEO at Touch International. "Customers will no longer be at the mercy of a single supplier. We are ready today to deliver high-quality touch screens in volume to OEMs and system integrators."

CGT features drift-free calibration and is offered in polished, anti-reflective and anti-glare finishes. There is immediate availability for flat sizes 12.1, 15, 17 and 18.1 inch, as well as curved sizes 15, 17 and 19 inch. Touch International touch screens can be custom designed to meet specialized application requirements or configured as drop-in replacements for competitors' displays.

The new product offers superior touch life and comes standard with a five-year warranty. CGT is tested to work with the following operating systems: MS-DOS, Windows 9X/2000/CE/ME/NT/XP, OS2, MAC and Linux.

### **About Touch International**

Founded by three industry veterans, Touch International, Inc. is a privately held, worldwide supplier of high-quality, touch-enabled monitors and touch screen components. Touch International offers a wide variety and rapid delivery of lower-priced, high-reliability products. Based in Texas, the Custom Solutions Center provides custom design and production to meet customer needs and specifications. Touch International has headquarters in Austin, Texas, and Trier, Germany, with additional sales and support offices on four continents.
